1. On 15 October 1954, the Ministry for Machine Construction forwarded its ~~draft of~~ the 1955 Production Plan (Projektbetriebsplanung) to the State Planning Commission for amendments and/or approval. It was expected that this Plan would be approved with no major changes. 25X1
2. The ~~projected~~ Plan lists the planned production (Warenproduktion) and the so called "factory result" (Betriebsergebnis) for all Main Administrations ~~Ministry's Main Administrations~~ for all enterprises under them. ~~as becomes~~
3. Warenproduktion is the total production for sale, ~~and~~ ~~consumption~~ production for consumption by the enterprise itself ~~which is called~~ ~~production~~; it is expressed in factory sales prices (Werkabgabepreise). The factory result (Betriebsergebnis) is the production result (Produktionsergebnis) plus or minus "other results" (Sonstiges Ergebnis). Produktionsergebnis is the turnover (Umsatz) minus the costs of the Umsatz. The turnover (Umsatz) is the total of products sold at actual factory sales prices. Other results (Sonstiges Ergebnis) consist of gains and losses made during preceding accounting periods and gains and losses not appearing in the turnover (Umsatz) such as costs for apprentices, training, etc. The factory result (Betriebsergebnis) is, in most cases, identical with the gross profit which is composed of the corporation tax, the two Director Funds and the net profit.
4. All amounts in the appended table are in millions of DME.
